

# NorthernWidget Library Manager Readiness Audit

Source: nw\_library\_audit\_2026-05-12.csv

## Tier 1 — Minor fixes only

| Library             | Type      | library.properties    | Examples | keywords.txt | getHeader/getString | API case  | Notes                                                                                                                                                                                                                                                                                                 |
|---------------------|-----------|-----------------------|----------|--------------|---------------------|-----------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Apis_Library        | Sensor    | OK                    | OK (2)   | OK           | Implemented         | lowercase | Most complete; ready for Core dependency wiring<br>Cleanest repo in the set<br>In good shape<br>version=0.0.0; needs examples + keywords.txt<br>version=0.0.0; URL points to Haar repo (wrong)<br>GetHeader/GetString need rename; URL uses underscore in org name<br>GetHeader/GetString need rename |
| DS3231              | Component | OK                    | OK (10)  | OK           | N/A (RTC)           | N/A       |                                                                                                                                                                                                                                                                                                       |
| Margay_Library      | Logger    | OK                    | OK (3)   | OK           | N/A                 | N/A       |                                                                                                                                                                                                                                                                                                       |
| Haar_Library        | Sensor    | OK                    | MISSING  | MISSING      | Implemented         | lowercase |                                                                                                                                                                                                                                                                                                       |
| T9602_Library       | Sensor    | OK                    | MISSING  | MISSING      | Implemented         | lowercase |                                                                                                                                                                                                                                                                                                       |
| Tally_Library       | Sensor    | OK (missing category) | OK (1)   | OK           | Implemented         | CAPITAL G |                                                                                                                                                                                                                                                                                                       |
| TP-Downhole_Library | Sensor    | OK                    | OK (1)   | OK           | Implemented         | CAPITAL G |                                                                                                                                                                                                                                                                                                       |

## Tier 2 — Moderate work

| Library          | Type   | library.properties                  | Examples | keywords.txt | getHeader/getString | API case  | Notes                                                                                                                                      |
|------------------|--------|-------------------------------------|----------|--------------|---------------------|-----------|--------------------------------------------------------------------------------------------------------------------------------------------|
| Walrus_Library   | Sensor | OK (missing maintainer + blank URL) | MISSING  | MISSING      | Implemented         | lowercase | Needs maintainer field, URL, examples, keywords.txt<br>Header returns 'Distance [mm],' — trailing space bug; needs examples + keywords.txt |
| MaxBotix_Library | Sensor | OK                                  | MISSING  | MISSING      | Implemented         | lowercase |                                                                                                                                            |

| Library       | Type      | library.properties   | Examples | keywords.txt | getHeader/getString | API case  | Notes                                                                                   |
|---------------|-----------|----------------------|----------|--------------|---------------------|-----------|-----------------------------------------------------------------------------------------|
| MS5803        | Sensor    | OK (blank paragraph) | OK (1)   | MISSING      | NOT implemented     | N/A       | Needs keywords.txt and sensor API implementation                                        |
| BME_Library   | Sensor    | MISSING              | MISSING  | MISSING      | Implemented         | lowercase | Has working API despite no metadata; needs library.properties + examples + keywords.txt |
| VEML6075      | Sensor    | MISSING              | OK (1)   | MISSING      | NOT implemented     | N/A       | Needs library.properties + keywords.txt + sensor API                                    |
| DS3231_Logger | Component | OK (blank paragraph) | MISSING  | OK           | N/A (RTC)           | N/A       | Needs examples                                                                          |

### Tier 3 — Substantial work or blocked

| Library         | Type      | library.properties | Examples               | keywords.txt | getHeader/getString | API case  | Notes                                                                                                    |
|-----------------|-----------|--------------------|------------------------|--------------|---------------------|-----------|----------------------------------------------------------------------------------------------------------|
| VEML6030        | Sensor    | MISSING            | MISSING                | MISSING      | NOT implemented     | N/A       | Essentially a stub; full work needed                                                                     |
| TCA9534         | Component | MISSING            | MISSING                | MISSING      | N/A                 | N/A       | Bare repo                                                                                                |
| MCP23018        | Component | MISSING            | MISSING                | MISSING      | N/A                 | N/A       | Bare repo                                                                                                |
| MCP4725         | Component | MISSING            | MISSING                | MISSING      | N/A                 | N/A       | Bare repo                                                                                                |
| MCP3421         | Component | OK                 | OK (1)                 | OK           | NOT implemented     | N/A       | BLOCKED: name conflicts with existing Arduino Library Manager entry; needs rename                        |
| Monarch_Library | Sensor    | MISSING            | NOT in examples/folder | MISSING      | Partial (LW only)   | CAPITAL G | BLOCKED: cross-contaminated with Dyson files; Monarch is successor to Dyson; rename undecided; no SW API |

| Library                    | Type   | library.properties             | Examples                   | keywords.txt | getHeader/getString | API case | Notes                                                                                                          |
|----------------------------|--------|--------------------------------|----------------------------|--------------|---------------------|----------|----------------------------------------------------------------------------------------------------------------|
